

\* Symptomatic Rapid testing will be performed by approved Staff members who have taken test training. Asymptomatic Cohort initial test will be performed by LL staff. The following 4 days of testing will be performed at home each morning.

\*\* If your child is a close contact or has tested positive, please notify Little Lamb immediately. We will guide you through the process of next steps. Please supply us with last date of exposure for close contact. Supply us with date of symptom onset or test date for positive case.

**Notes on Household Exposures:**

- For determining ANY quarantine period, you must determine the contact's last exposure to the infectious person. That is Day Zero. For Household Members who cannot completely separate, (children, spouse, roommates, etc.), they are "in quarantine" while continuously exposed to the case.
- However, their FINAL 14 Day Countdown of Quarantine does not begin until they are no longer being continuously exposed.
- In other words, their final 14 day Quarantine begins after their LAST/Final exposure to someone infectious.
- If the CONTACT cannot separate from the CASE, then the Case must stop being infectious (be released from isolation). A case's final infectious day will determine the contact's final exposure date.
- Index case's last day in Isolation (Day 10) = Day 0 (Final Exposure) for counting out the contact's quarantine. If your child has tested positive in the last 90 days, they are exempt from testing. If they present symptoms in this 90 day period, please keep them home and contact health care provider.

\*\*\* While in the program, on the additional 5 days of "wear a mask around others" these individuals will eat and nap apart from the group. Students will be placed in view but greater than six feet away from the others. As always, you can make the parental decision to keep your child home longer than the required period.
